

One of the strategic goals of Agency **ARWES** is to develop awareness for Environment protection therefore we support every project that aims at launching Eco Production with green technology.

In our business we focus on the following issues:

- use of environment friendly materials
- taking preventive actions for accumulating huge amounts of waste
- decreasing the dangerous characteristics of the waste
- treatment of waste and planned control of the waste disposal process
- transporting hazardous waste to specific locations
- support of equipment for waste treatment if possible
- waste recycling
